

ELECTRIC RADIANT FLOOR HEAT FILM

Think a tiny house can't handle a 15w/sf radiant floor heat system?

You don't need as much heat film as you might think!

This installation uses approximately 9.75 amps of 120V power.

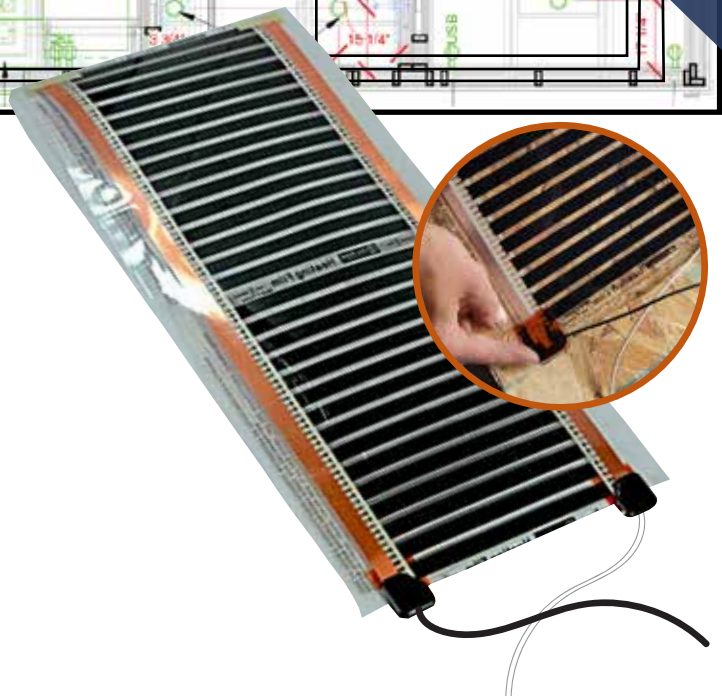

200 sf Tiny House

Black Gold
By Gold Heat

ELECTRIC RADIANT FLOOR HEAT FILM

- Designed especially for mobile tiny houses
- In-stock & available in multiple widths
- Does not require thinset, clips, or wire stringing
- Pre-terminated to save you installation time
- Lightweight and low-profile
- For use under all flooring types
- Quick and easy installation

Your kit includes:

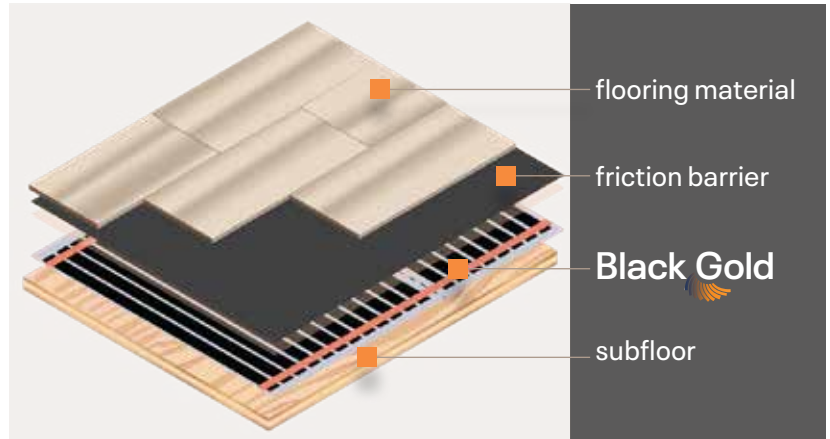

Your pre-measured, pre-terminated Black Gold film strips

Thermostat that includes a floor heat sensor

Floating floor stack up

Black Gold film adds just 1/16" to the total floor stack up.*

* Total stack-up varies with flooring material.
